

ALUMINUM BARN DOORS

STUDIO

Partitions

KOMANDOR

STUDIO system

Studio – featuring no bottom track, the system is based on a narrow modern profile, which gives a light and open feel to the design. Studio doors can either be opened simply by means of the frame, or can feature a horizontal joiner rail with an integrated recessed handle. It may also be arranged in a corner configuration, and fits perfectly with modern, industrial, loft, or minimalist interiors.

The Studio system allows for the production of single or double barn-style sliding doors and the combination of various insert materials within one door. It is also possible to use decorative strips in the colour of the system.

PARAMETERS

- max door height: 2,75 m
- max door width: 1,50 m

PROPERTIES

- modern, industrial look
- wide use in interior design
- a quick way to separate the living space
- quiet work of the running gear
