

**KOMANDOR**

# **ADVANTAGES**

**THE SMOOTHEST QUIETEST LONGEST LASTING DOORS IN THE BUSINESS**

# KOMANDOR Advantages

## Responsible Procurement

Our products set the industry standard for quality, performance, durability and added value because we oversee every aspect of design, production and installation. Every component has been specially designed and fabricated to meet exacting quality expectations and rigorously tested to last a lifetime.

Canadian engineering paired with European craftsmanship.  
We guarantee the quality of each and every component no matter how small.

### Sourced exclusively in Canada and Europe

- raw materials (steel and aluminum)
- hardware (metal stamping and injection molding)
- profile roll forming and extrusion
- design and fabrication

**We manufacture all of our own frames, tracks, rollers, and related hardware.**

# KOMANDOR Advantages

## Secrets to our Success

### Rollers

Komandor Rollers were engineered in Canada, and were patented in the 1990's

- featuring ball bearings (we got our inspiration from RollerBlades!!)
- integrated anti-jump mechanism
- bottom-track nylon rollers are height adjustable and are paired with high grade plastic top guide rollers
- top hung partitions feature robust rollers and protected sturdy guide pins

### Benefits

- **quiet, smooth, long-lasting and dependable operation**
- **doors never jump out of the track**
- **eliminates gaps, for openings that aren't perfectly square**
- **superior load carrying for oversize doors and higher quality inserts**

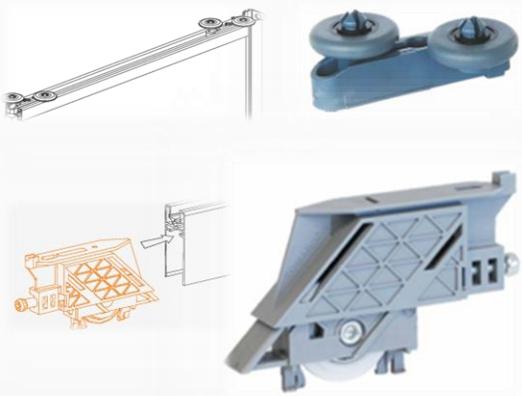

# KOMANDOR Advantages

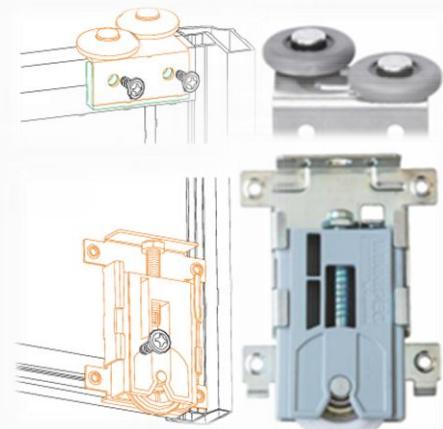

## Secrets to our Success

### Rollers

Bottom rollers hidden within the frame itself to allow transparent and translucent inserts

Bottom rollers tucked away with minimal protrusion, for cost-effect opaque inserts

LUMI top hung rollers hidden and protected within robust upper track, engineered for suspended doors

Our highly affordable top hung ST15 system with higher grade plastic rollers (no ball bearings) feature a bottom guide with anti-jump mechanism built to protect the guide pin

# KOMANDOR Advantages

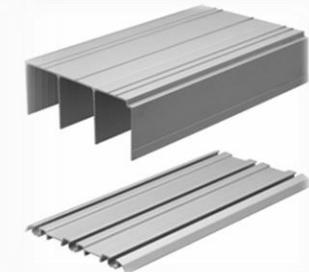

## Secrets to our Success

### Frames, Tracks & Inserts

Ours are manufactured differently

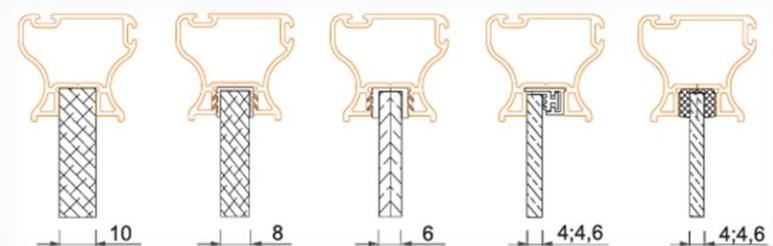

- thicker gauge metal on both frames and tracks
- top hung partitions feature a carefully engineered and even thicker upper track

### Benefits

- **Rigid high-quality doors**
- **Ability to support thicker more robust inserts**

- ✓ 10mm (3/8") low VOC Euro laminate panel
- ✓ 4mm, 5mm, 6mm glass and mirror

# KOMANDOR Advantages

## Secrets to our Success

### The Bottom Line

THE SMOOTHEST QUIETEST LONGEST LASTING DOORS ON THE MARKET

Komandor doors will never jump the track, or have that rattle, shudder and noise characteristic of inferior rollers, frames and inserts. None of our doors have a high-wear, easily broken, brittle, small noisy plastic guide in the bottom track.

Replacement parts are always available and in stock.

**Individual door panels max out at 9' heights and 4' widths.**

**Wall-to-wall and floor-to-ceiling closets and wall units.**

**Visually striking looks - Optimized storage access - Maximum square footage usage**

# KOMANDOR Advantages

## Complimentary Design & Quotation

Our in-house Design Consultants are product specialists for both residential and commercial settings.

We have benefitted from very little turnover over the years, so the depth of knowledge and extensive experience each of our Design Consultants possess will serve you well in achieving your goals rapidly.

Our Design Team functions in a collaborative environment, so you benefit from the experiences of all of our team members collectively.

**Site measurements are confirmed by our Designers to ensure a perfect fit.**

# KOMANDOR Advantages

## Proprietary Design & Production Software

Komandor's proprietary CAD software has been tested, refined and standardized across production in all of Komandor's global branches.

Every design produces highly accurate 3-D renderings and equally accurate quotations.

Once a design has been confirmed and sent into Production, it syncs up with our CAM software, which is also a proprietary global asset.

**Ultimately, the result is a system produced exactly to your specifications: a fully custom product to the nearest 1/32" on the height, width and depth.**

# KOMANDOR Advantages

## Single Source Fabrication

Our Fabricators are specialists who have decades of combined experience in crafting each product with care.

Reading blueprints, liaising with the Design Team, and producing a precisely tailored system are a point of pride.

We employ a mentoring and apprenticing model, while also cross-training our newer Fabricators-In-Training via on-site installation so that they have a depth of knowledge and experience that will enable them to understand the product from a wholistic approach.

**Components are stocked in our Mississauga factory warehouse, making for shorter lead times. We have what you need in stock, on premises.**

# KOMANDOR Advantages

## Factory-trained Install Teams

To ensure you receive unsurpassed customer service, Komandor employs its own in-house Installers.

Our Install Teams are committed to our products, are professionally trained and arrive equipped with the latest tools to install your quality product and overcome virtually any site condition challenges.

Our installers take pride in getting your project done right, the first time.

**Komandor never subcontracts to third party installers, ensuring we remain accountable to you throughout the entire process.**

# KOMANDOR Advantages

## Fully Insured & Warrantied

With a Komandor product, you never have to worry. Doors fit as they should, hardware never wears out, and all products are made with the most durable materials available. Komandor's production process meets international ISO standards.

Full employee WSIB coverage and clearance certificates provided on request.

Evidence of insurance showing minimum of \$5,000,000.00 general liability as well as owned and non-owned vehicle coverages to be provided. Named parties can be added as additional insured on request.

**We're so sure of our products that we offer a 10-year manufacturer's warranty** on all systems installed by our in-house Install Teams. A 2-year warranty applies to systems installed by our Dealer/Distributors in areas outside of the GTA.

**We rarely get repair calls, and have been operating in Canada for over 25 years.**

# **KOMANDOR Advantages**

**THE LAST SET OF DOORS YOU'LL EVER BUY!**

Mechanisms will never need cleaning, adjusting, maintaining, or oiling.  
Repairs are rare, and free within warranty.
