HELIODOR

system
glued version

HELIODOR - in the glued version is about a subtle finish and invisible frames, which is why it is called a frameless system. Doors equipped with the Comfort Touch closing mechanism operate on the „push to open“ system, thanks to which, when slowing down, they are safe to use and incredibly quiet. Heliodor is a unique solution on a global scale, and thanks to the invisible frame, it fits in the latest trends in modern interior design. The system is dedicated mainly to clients who are guided by elegance and looking for unconventional solutions. Heliodor will find itself in minimalistic, avant-garde, and glamour styles.

The Heliodor system in the glued version enables the production of sliding doors with a glass insert, which can be joined both vertically and horizontally within one door.

PARAMETERS

- max door height: 2,75 m
- max door width: 1,50 m

PROPERTIES

- the anti-jumping function protects the door against falling out of the bottom track
- rollers equipped with bearings ensure light door sliding with ease
- hidden upper and lower rollers
- Comfort Touch mechanism provides soft and quiet closing of the door

Frameless

HELIODOR

system
with 6mm frame

HELIODOR - version with delicate, 6 mm frame is a perfect solution for both classic and modern spaces. Its greatest advantage is the possibility of using large pieces of panels or glass, without divisions, which are fixed directly to the aluminum frame. The slim line of the frame makes it practically invisible, making the fronts look frameless. In the case of a board insert, it allows to emphasize the wood grain and the structure of the rings. In case of glass surfaces, it accentuates the purity of the form and the elegance of glass. Fronts in this system are an original design, as well as style and class in one.

The heliodor system in the version with a delicate frame enables the production of sliding doors with a panel or glass filling. It also allows you to connect different fillings within one door, through their perfect fit or by means of a delicate and supple connection strip.

PARAMETERS

- max door height: 2,75 m
- max door width: 1,50 m

PROPERTIES

- the anti-jumping function protects the door against falling out of the bottom track
- rollers equipped with bearings ensure light door sliding with ease

6mm Frame

HELIODOR

system

with 6mm frame and handle

Heliodor in the version with a delicate 6 mm frame has been additionally equipped with a bespoke handle, enabling the door to be opened without using the Comfort Touch soft closer. Thanks to the subtle yet practical handle, it is perfect for fronts with glass and mirror inserts as it prevents the fingerprints. Using large panels of glass, without any joints is possible, so as a result, we get harmonious and sophisticated door with a unique and modern look that fits into classic modernist, minimalist, and contemporary interiors.

The heliodor system in a version with a delicate frame and a handle allows you to make sliding doors with a glass filling, without any joints.

PARAMETERS

- max door height: 2,75 m
- max door width: 1,50 m

PROPERTIES

- the anti-jumping function protects the door against falling out of the bottom track

Insert materials - Glazing

PLEASE NOTE: structurally Heliodor typically requires a re-enforcing support bar on the back side midway through its height and therefore does not lend itself to transparent glass. Exceptions to this would be where an industrial feel is desired,
